**Sky Led**  
by Ayhan Guneri

Lighting Element: SKY LED is a lighting system which creates a solution without consumption to ambient lighting. It produces energy that need its own with benefiting from solar and wind energy and stores natural energy with photovoltaic panels from the sun and turbines from the wind and converts natural energy to light and contribute to a sustainable environment without the using of existing energy resources in the underground. SKY LED provides surround illumination both directly and indirectly with the two light source. At the same time, it provides extraordinary illumination with changing color diffusion.
